

OneMillionLights

Change You Can See

Clean, Safe Solar Lights Change Lives

- Help a child read in clean, healthy solar light
- Eliminate CO₂ emissions
- Improve health in rural communities
- Help families save and generate income

Our Mission is to improve the daily lives of adults and children in rural parts of the world by providing clean, safe solar light.

About the School Program

LOOKING FOR

Schools, students, clubs, groups, classrooms, PTAs, and teachers who love serving the global community, want to learn about another region of the world, and want to make a difference!

HOW IT WORKS

Your group chooses a region of the world to adopt and send solar lights to, One Million Lights sends you a customized packet to help you learn about this community and the power of solar, and then your group fundraises to send solar lights to that community!

WHY

All participants are empowered to take action to improve the environment, education, and global poverty, all while learning that their contribution can transform lives overnight with the power of solar lights.

Background Information

Learn about what One Million Lights does and why clean, safe light is so important for students and families living in poverty.

Academic Lessons

We've created and compiled interdisciplinary lessons that help students understand the cultural, environmental, and social aspects that are related to our solar light distribution programs. Use these lessons as engagement activities to your existing curriculum or fun extracurricular activities.

Fundraising Toolkit

Our programs will give you a number of proven ways to reach out to your community and empower people to fund solar lights that will change lives.

Program Follow Up Reporting

Once you've funded a project, we will send you pictures, stories, and videos from communities about the impact the solar lights are having.
